

# Logo Proposal

for the Department of Informatics & Telecommunications  
at the University of Peloponnese

# Symbolism

1. d i t , the acronym that derives from the department name. Department of Informatics and Telecommunications - DIT.
2. Circuit Vectors, Symbolising Computer Science
3. Radio Signal that's being transmitted, symbolizing Telecommunications Science
4. The University Logo

# Regular, Simple and Inverse Versions

Note: The regular version is recommended to be used as a stand-alone logo, and the other two versions are recommended to be used side-by-side with the university logo (Pelopon), but can also be used by themselves for simplicity.

# Coloring Customizations

All versions have a template SVG that can be edited so the colors match the needs of the area used.

Ex: For the Regular (shown left) Logo there are three parts that can be colored independently:

1. main focus of the logo, includes the "dit" and the border
2. secondary/complimentary are the elements representing the department fields
3. UoP logo (Peloponnesian) in the background.

The other versions have similar behavior as well.

# Versions

# Uses

In general, the logo can be used wherever representation of our department is needed. More specifically, the logo can be used at:

- Websites (related to dit)
- Slides
- Banners-Posters
- Unofficial paperwork etc.

# Thank You!
